

# Whole Class

**Smart Learner** is an excellent resource to use when you are demonstrating a concept to the whole class. Whether the children are seated on the carpet area or at desks, the bright colours and fun design of **Smart Learner** are sure to gain the children's attention.

The following are some ideas for effective use with a whole class.

- Introduce plain shapes using the colourful EVA foam shapes and magnetic whiteboard
- Count on with the number line
- Retell a story using the felt board and felt pieces.

More activity ideas can be found in the **Smart Learner** Manual.
